Ovate Business Solutions is unlike any technology company you've ever worked with. We deliver what you would expect from your own team of IT professionals...if you could afford to hire them on a Charter School budget.

We speak Education, so we understand and work within your special set of circumstances. We believe in and support Charter Schools because we believe in school choice.

Our desire is to provide affordable and professional support for all of your technology (even the technology traditional IT folks won't support) and we strive to develop long-term relationships with our customers.

## HOW WE WORK

### Approach

## Our Values

### Passion

We love what we do. It's always fun and new challenges are met with enthusiasm.

### Excellence

We deliver our promises and add unexpected values to our clients' businesses.

### Innovation

Using recent technology updates, trends and systems, we make deploying the right solution for your business.
